

→ HIGH VOLUME **SENDPRO P1000** [FRANKING SYSTEM]

SENDPRO P1000

TAKE CONTROL OF EVERYDAY CHALLENGES.

Integrate your sending processes.

Sending daily letter mail and receiving packages are a necessary part of doing business. Yet, these seemingly simple tasks are actually complicated processes that demand proper attention.

The SendPro P1000 simplifies the process by integrating mailing and receiving into a single processing system. With this combination, the P1000 provides a simpler, more streamlined way to send letter mail and large envelopes. With the receiving application, you can accurately log all of your incoming packages and important documents so that you have an accurate history of every item that has been delivered to your office.

With sending costs rising and becoming more complex, the SendPro P1000 can also quickly improve productivity and cost efficiency in your office.

Mail with ease.

For letter mail, the SendPro P1000 will seal and print postage for your short and longer runs at up to 180 letters per minute. It handles thin or thick mail as well as small or large envelopes. The SendPro P1000 mailing system guides your operators with its easy-to-follow menu on the colour touch screen, so that anyone in your organisation can operate it. And with the flexible printing features, you can choose what colour to print a return address, business logo or promotional message on your envelopes eliminating the costly expenses of pre-printed envelopes and special order printing.

Flexible printing

Intuitive user display

Manage inbound deliveries.
