

→ HIGH VOLUME **SENDPRO P1500** [FRANKING SYSTEM]

SENDPRO P1500

MAKE YOUR JOB SIMPLER,
BE MORE **PRODUCTIVE**.

Streamline your office workflow.

Meeting your office deadlines for billings, statements and customer notifications is critical. It can be difficult when you have to juggle different types of mail and ensure that every piece has the correct postage and tracking barcode when required. Every job needs to be done right, and done on time. Meet the daily challenge with the SendPro 1500.

The SendPro P1500 simplifies the process by integrating mailing and receiving into a single system. With this combination, the P1500 provides a simpler, more streamlined way to send letter mail and large envelopes, and track inbound deliveries. With the receiving application, you can accurately log all of your incoming packages and important documents so that you have an accurate history of every item that has been delivered to your office.

Simplify processing.

For letter mail, the SendPro P1500 will seal and print postage for your short and longer runs at up to 120 letters per minute and up to 16mm thick. With the Weigh-on-the-Way® (WOW) and Dimensions-on-the-Way® (DOW), sorting mixed size mail is no longer necessary. The P1500 can process a stack of mixed size mail at up to 60 letters per minute applying the correct postage for each piece.

The SendPro P1500 mailing system guides your operators with its easy-to-follow menu on the colour touch screen, so that anyone in your organisation can operate it. And with the flexible printing features, you can choose what colour to print a return address, business logo or promotional message on your envelopes eliminating the costly expenses of pre-printed envelopes and special order printing.

Flexible printing

Intuitive user display

Manage inbound deliveries.
