

→ HIGH VOLUME **SENDPRO P2000** [FRANKING SYSTEM]

SENDPRO P2000

HAVE THE RIGHT TOOLS FOR YOUR STAFF.

Control costs and help drive revenue.

Your mail centre is a hub of business activity. How you equip your business has direct consequences to your costs and revenue. The SendPro P2000 mailing system is designed to meet the demands of your busy mail centre. It simplifies and integrates mailing and receiving into a single system providing a more streamlined way to send letter mail and large envelopes. With sending costs rising and becoming more complex, the P2000 can also quickly improve productivity and cost efficiency in your office.

Streamline workflow.

The SendPro P2000 mailing system guides your operators with its easy-to-follow menu on the colour touch screen, so that anyone in your organisation can operate it. For letter mail, the SendPro 2000 will seal and print postage for mail up to 16mm thick at up to 180 letters per minute.

With the Weigh-on-the-Way® and Dimensions-on-the-Way® (DOW), sorting mixed size mail is no longer necessary. The P2000 can process a stack of mixed size mail at up to 110 letters per minute applying the correct postage for each piece. With the receiving application, you can accurately log all of your incoming packages and important documents so that you have a history of every item that has been delivered to your office.

Intuitive user display

The modern, colour touch screen display of the P2000 enables anyone in your office to pick the ideal service and complete each job quickly and accurately. The system guides the user with its easy-to-follow menus for receiving packages and processing mail.

Flexible printing

Intuitive user display

Manage inbound deliveries.
